

The reliable partner for your innovation

ASSEMBLY INTEGRATION TEST / VALIDATION
ELECTRICAL / IT / MECHANICAL ENGINEERING
FLIGHT TEST INSTALLATION
MULTI-TECHNICAL TEST BENCHES & CABLING

The most demanding industries have trusted Clemessy Switzerland with their projects, making our company a key player on the aerospace, scientific research and transportation infrastructures markets.

The Aerospace MRO industry values our expertise, because we provide turnkey solutions which reduce your aircrafts turnaround times (TAT), increase end-user satisfaction and develop your technical capabilities.

Our comprehensive offering serves aircraft's major equipment, covering several ATAs chapters for testing as well as development activities.

Thanks to Clemessy Group's worldwide locations and network of partners, we are able to provide and maintain our solutions to maintenance and completion centers, airlines, armed forces, OEMs and system manufacturers all over the world.

Innovation oriented :

- Electric Green Taxiing System –a Safran and Honeywell Aerospace joint development
- Clean Sky joint technology initiative –HighPMAAC project

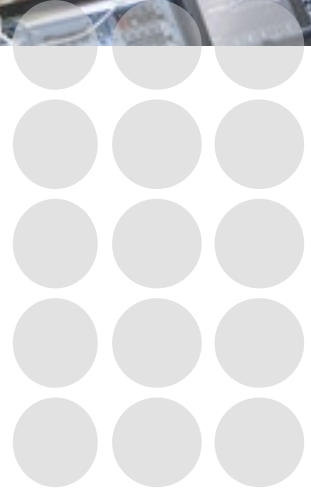

OFFERS

- SMART Flight Test Installation
- ATE for avionics equipment
- Data loading / configuration management with LRUs
- Fly-by-wire flight-controls test bench
- Integration rig (ironbird) for R&D and upgrade projects
- Battery conditioning equipment
- Combined stresses battery testing equipment
- Battery simulator
