

Electrical engineering Mechanical engineering

Our business

Performing design, integration, installation and maintenance work as well as improving systems and equipment in the fields of electrical and mechanical engineering

Projects & proximity

Whether it be large turnkey projects or proximity work, our teams are mobilised locally and propose a range of solutions and services in line with your requirements

- Power & lighting, communications
- Automated systems
- Monitoring & control
- Industrial Information Technology
- Robotics
- Control & regulation
- Instrumentation
- Mechanics
- Hydraulics
- Pneumatics
- Piping

Systems and expertises

Our multi-technical expertise, combined with our commitment to R&D, enable us to build turnkey systems and equipment dedicated to numerous industrial processes.

- Test and validation systems
- Monitoring machines
- Special machines
- Analysis systems
- Assembly systems
- Hydraulic systems
- Handling systems

Head Office
